

GHOSTWORKS GT24 & 34 Class

High-Speed | Modular | All-Weather | Optionally Crewed

The changing security environment requires assets that are smaller, more dispersed, lower signature, and optionally manned. GHOSTWORKS is leveraging its racing/commercial carbon fiber boat building expertise and military/security experience to bring to market this versatile, cutting-edge platform.

GT catamarans utilize a unique and patented hull shape that evolved from prior successful Morrelli & Melvin high-performance designs into the GT powercats' semi-asymmetric demihull cross sections and carefully engineered transverse steps. GTs simultaneously provide best in class speed and efficiency, low vertical accelerations, excellent high-speed maneuvering characteristics, and rock-solid dynamic stability. These features collectively allow operation at high speeds on the open ocean with reduced fatigue and a lower probability of injury or equipment failure.

The GT platform's flexibility allows customization for a wide variety of missions, including but not limited to security, policing, search & rescue, logistics, and research operations, and can be customized to accommodate a variety of electronics and customer-furnished weapon systems.

The GT series is designed for landing on the beach or in a well deck of a larger mothership. The monocoque design is minimally manned by a crew of one (1) or two (2) or can be upgraded to uncrewed. It affords flexibility to carry modular packages, allowing rapid-ready refit for missions to occur quickly and safely.

Built with advanced carbon manufacturing techniques, the GT family of vessels often can be produced in six (6) to nine (9) months, depending on the options selected.

GT24 Specification	Standard	Options
Overall Length	7.3m / 24ft	7.3m / 24ft
Overall Beam	2.6m / 8'6"ft	2.8m / 9.2ft
Height	3.0m / 10ft	Per Upgrades
Displacement	1633 kg	Per Upgrades
Fuel Cap.	303 Liters	Per Upgrades
Range	350+ miles @ 26 knots	Per Upgrades
Max Speed	42 knots	Per Upgrades

GT34 Specification	Standard	Options
Overall Length	10.8m / 35.5ft	10.8m / 35.5ft
Overall Beam	3.7m / 12ft	3.7m / 12ft
Height	3.5m / 11.5 ft	Per Upgrades
Displacement	4173 kg	Per Upgrades
Fuel Cap.	1552 Liters ^410 gals	Per Upgrades
Range	600 miles @ 28 knots	Per Upgrades
Max Speed	52 knots	Per Upgrades
